Hi all,

The results of the remote experience survey are posted. There is a public version on the IR site. <http://ir.mit.edu/remote-experience>

Jon Daries has also posted internal version of the report that allows you to see department level responses as long as there are at least 15. Here is the URL:

<https://tableau.mit.edu/#!/site/IR/workbooks/5434/views>

All Academic deans and all department heads have access to this view. Under the breakout dropdown in the top right of any of the pages, choose a school and you will see the results by department. We did it this way to keep it tidy, but all departments are shown as long as there are 15 responses.

Please let us know if you have any questions.

Thanks,

Lydia and Jon
