51 Pegasi b

Fellowship in Planetary Astronomy

Now Accepting Applications!

The Heising-Simons Foundation invites applications for the 51 Pegasi b Fellowship. The fellowship program recognizes early-career investigators of significant potential and provides them with the opportunity to conduct novel research in theory, computation, observation, instrumentation, and lab experiments. The fellowship program aims to advance our fundamental understanding of solar system science, exoplanet science, and other closely related topics.

The Foundation anticipates awarding six to eight fellowships this year. Each recipient will receive a three-year grant of up to \$375,000. For more information about the fellowship and eligibility requirements, visit www.51pegasib.org.

The Heising-Simons Foundation is committed to diversity, equity, and inclusion. Women, persons with disabilities, racial and ethnic minorities, persons of minority sexual orientation or gender identity, and others who belong to groups that have been historically underrepresented in planetary sciences and astronomy are encouraged to apply.

The deadline to apply is Friday, October 2, 2020, at 11:59PM Eastern Time, so we encourage you to start your application soon, or to forward this email to someone you think would make a terrific candidate!
