The mission of the Department of Defense (DoD) is to provide the military forces needed to deter war and protect the security of the United States. To support this mission, the DoD is the largest employer of scientists and engineers in the nation. To ensure a continued talent pool, the DoD works hard to grow the Science, Technology, Engineering and Math (STEM) workforce. The DoD’s Research Participation Programs are managed by the Oak Ridge Institute for Science and Education (ORISE) under an interagency agreement between the DoD and the U.S. Department of Energy (DOE). With the support of the DOE interagency agreement and management from ORISE, the DoD prepares and strengthens the United States STEM workforce.
