MC

Peter,

Should I send this to all the faculty? Not sure how many would be interested...

Thanks!

Matt

Hey, Matt,

Is this something you would want to forward to our faculty, or not?

C.

Begin forwarded message:

Good afternoon,

I hope you are well. I just wanted to follow up with you regarding my email below. Do you think you'll be able to share this message with faculty in your department? Please let me know if you are able to (or if you've already distributed the email). If you are not the correct person in your department to speak with, I'd very much appreciate it if you could let me know the correct person to contact.

Thanks so much!

Best,

Danielle

Subject: Call for Proposals: MIT J-WEL Grants in Education Innovation (pK-12, Higher Education, and/or Workforce Learning)

Good afternoon,

I am the Communications Coordinator with the MIT Jameel World Education Lab (J-WEL). I am emailing you because we have just released a grants Call for Proposals that we think may be of interest to some of the faculty members and researchers in your department. I was wondering if you would be able to pass our email message along to your faculty members (below). Please let me know if you are able to do so!

If you are not the right contact for your department, can you please direct me to the correct person to contact? Thank you for your time!

Best,

Danielle Pagano

J-WEL Communications Coordinator

Dear Colleagues,

The Abdul Latif Jameel World Education Lab ([J-WEL](#)) invites MIT faculty from any discipline to submit proposals for our 2021 Grants in Education Innovation cycle for any of our three programs:

- [Grants in pK-12 Education Innovation](#) (due February 5, 2021)

We encourage faculty to propose educational innovations and research that will impact a broad base of global pK-12 educators and learners, while also considering the relevance to learners in the USA. Awards range from \$20-80k and will be for up to 12 months in duration, ending in Spring 2022.

- [Grants in Higher Education Innovation](#) (due February 5, 2021)

We provide seed funding to enable MIT faculty, staff and students to engage in projects to reimagine teaching and learning in higher education. We are particularly interested in innovations rooted in MIT's research and practice with the potential for generating high impact on higher education globally. Awards range from \$10K-80K for the duration of up to 12 months.

- [Workforce Learning Innovation Research Grants](#) (due January 20, 2021)

We provide seed funding for research projects that will improve workforce learning around the world. Ideal projects will improve advice, learning, assessment, or credentialing for individuals, or will help organizations or governments to assist workers in these ways. Awards range from \$20K-\$70K.

For deadlines, detailed call for proposals, forms, and templates, please visit the J-WEL Education Innovation Grant program pages: <https://jwel.mit.edu/mit-faculty>

On the grant program pages, you will find information on how to contact us for specific questions about the process. We welcome your comments or suggestions and look forward to receiving your proposals.

Sincerely,

Dr. Claudia
