CA

~The following message is being forward on behalf of SPS and UWIP~

**Announcing PRISM 2021:
a virtual physics conference in February!**

PRISM is organized by MIT SPS and UWIP, along with Harvard SPS and Wellesley SPS. The conference is open to undergraduates at any of these institutions doing any kind of physics project. Whether you've just started doing research or are ready to publish, whether you're presenting on your UROP, REU, or a final project — PRISM is a great way to showcase your work in a low-key environment, practice your presentation skills, and learn about the cool work being done by others in the world of physics! We have both oral presentations and poster sessions, so you can choose the format that works best for you!

The conference will take place from Monday, February 1, 2021 to Friday, February 5, 2021.

  [You can find more information and register at our website!](#)    

We also have several fascinating invited speakers, who will share a little bit about their fields and their current projects. This is a great way to learn more about the breadth of physics research, and maybe even scope out new research projects you can contribute to!

Register by January 18th if you are interested in presenting! Attendance is open to the broader public, so if your supervisor wishes to see you present, they can join too. **We request that all attendees sign up by January 31st.**

Feel free to email prism-organizers@mit.edu if you have any questions about the conference not answered by the FAQs section of our website.
