Dear Colleagues,

The Abdul Latif Jameel World Education Lab (J-WEL) invites MIT faculty to submit proposals for our 2021 Grants in Education Innovation cycle for any of our three programs:

- **Grants in pK-12 Education Innovation** **(due February 5, 2021)**

We encourage faculty to propose educational innovations and research that will impact a broad base of global pK-12 educators and learners, while also considering the relevance to learners in the USA. Awards range from $20-80k and will be for up to 12 months in duration, ending in Spring 2022.

- **Grants in Higher Education Innovation** **(due February 5, 2021)**

We provide seed funding to enable MIT faculty, staff and students to engage in projects to reimagine teaching and learning in higher education. We are particularly interested in innovations rooted in MIT's research and practice with the potential for generating high impact on higher education globally. Awards range from $10K-80K for the duration of up to 12 months.

- **Workforce Learning Innovation Research Grants** **(reviewed quarterly)**

We provide seed funding for research projects that will improve workforce learning around the world. Ideal projects will improve advice, learning, assessment, or credentialing for individuals, or will help organizations or governments to assist workers in these ways. Awards range from $20K-$70K.

For deadlines, detailed call for proposals, forms, and templates, please visit the J-WEL Education Innovation Grant program pages: https://jwel.mit.edu/mit-faculty

On the grant program pages, you will find information on how to contact us for specific questions about the process. We welcome your comments or suggestions and look forward to receiving your proposals.

Sincerely,

Dr. Claudia Urrea	Julia Reynolds-Cuéllar	Susan Young	Dr. Saif Rayyan
