Dear Chairs of Physics Department,

We would like to share an exciting opportunity at the University of Chicago for recent PhD graduates and postdocs with experience in quantum science and engineering. We are developing an undergraduate laboratory in quantum science and are recruiting a Lab Director. Here is the posting for the position:

https://uchicago.wd5.myworkdayjobs.com/en-US/External/job/Hyde-Park-Campus/Lab-Director--Undergraduate-Quantum-Education-Laboratory_JR14315

The Lab Director will oversee the design and implementation of teaching experiments in a broad variety of quantum platforms. The experiments allow for a huge degree of flexibility and customization. The lab will be located in newly renovated space in the Kersten Physics Teaching Center. This is a rare opportunity to develop an entirely new teaching experience from the ground up.

We greatly appreciate it if you could pass this information on to your faculty and/or potential candidates. If you would like to learn more about the position, please do not hesitate to reach out to us.

Best regards,
Professors Alex High and Hannes Bernien (ahigh@uchicago.edu,
bernien@uchicago.edu)

The Pritzker School of Molecular Engineering
The University of Chicago
