Dear Peter and Rob

See below, on an event led by NASA about open science. Are their faculty or instructors in your departments who might find this useful or could contribute stories?

Best
Rebecca

Dear Friends of Open Science,

NASA's Transform to Open Science ([TOPS](#)) mission is working to accelerate the adoption of open science and create a more equitable scientific future.

Our next [community forum](#) will be on **Thursday, July 14, 2022 at 1 PM EDT (10 AM PDT)**. We will be joined by the OpenCore Curriculum Module Leads and Content Subject Matter

Experts to discuss their recent work developing the lesson material and next steps towards advancing this work with the community.

Most of this forum has been left open for

community questions and discussion. We want to hear from you!

To join us, please [register](#). Also [submit questions](#) and if willing, submit your name at the start of your question so that we can make this more of an interactive discussion forum.

TOPS wants to highlight open science. We are collecting stories of practicing open science. If you are interested in sharing your story through a virtual interview, please sign up [here](#).

In the spirit of Open Science – we will be maintaining our transparency and sharing updates regularly through our [GitHub site](#) which has discussions enabled. Over the next week, we will continue to answer community questions and add them in the [Q&A Discussion area](#). Please feel free to post additional questions or provide feedback!

Thank you again and we are looking forward to engaging with you soon. As always, please feel free to forward to your network!

Cynthia Hall

TOPS Community Coordinator, on behalf of the Transform to Open Science Team
<https://github.com/nasa/Transform-to-Open-Science>

NASA is committed to providing an inclusive, safe, professional, and welcoming environment for all meeting participants. We respectfully ask that all attendees adhere to our code of conduct and have a zero tolerance policy for those who do not.

Cynthia Hall

Transform to Open Science (TOPS) Community Coordinator
